institute and innovation
partner

So why foresight, and what is it in Sweden?

“Foresight is a systematic, participatory, prospective and policy-oriented process which, with the support of environmental/horizon scanning approaches, is aimed to actively engage key stakeholders into a wide range of activities anticipating, recommending and transforming (ART) technological, economic, environmental, political, social and ethical (TEEPSE) futures.” (R. Popper, 2014)

“Foresight is the discipline of exploring, anticipating and shaping the future to help building and using collective intelligence in a structured, and systemic way to anticipate developments.” (European Commission, 2021)

Common questions and misunderstandings

You cannot predict the future

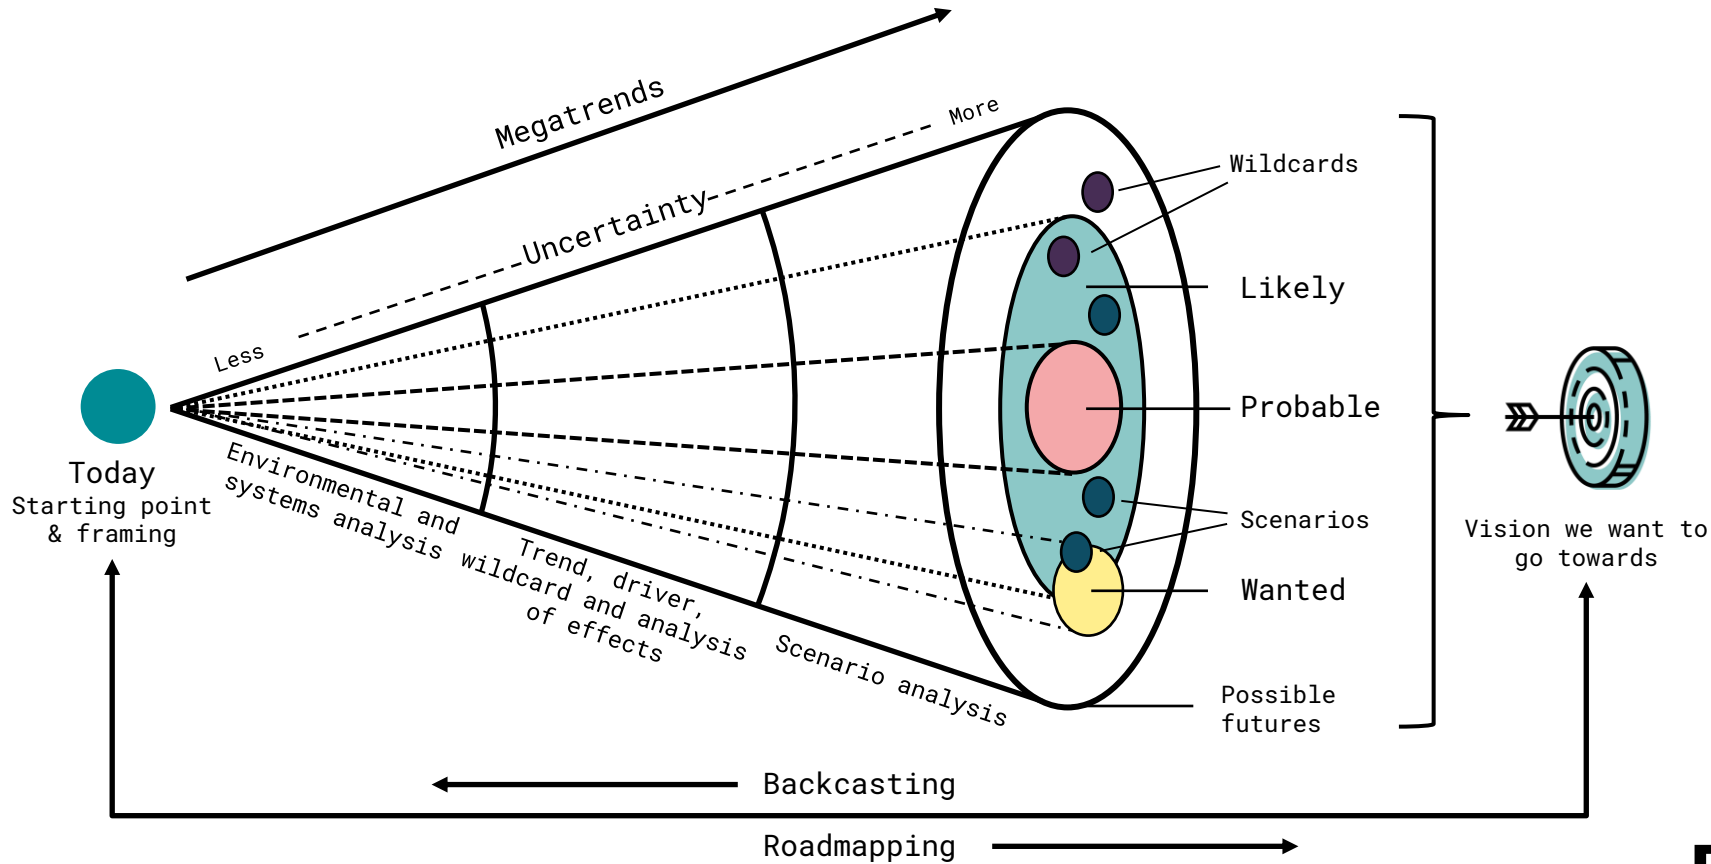

That can't happen, can it?

It will happen, I'm certain of it!

Oh, you do modelling and forecasting

Analysis and development

Advise and training

Custom-designed workshops

Interactive formats

RUGGEDISED

Trend analysis, Scenario analysis, Visions

2016-2018. Rotterdam, Umeå, Glasgow, ... Funding: European Commission, Horizon 2020

Fossile-free aviation 2045

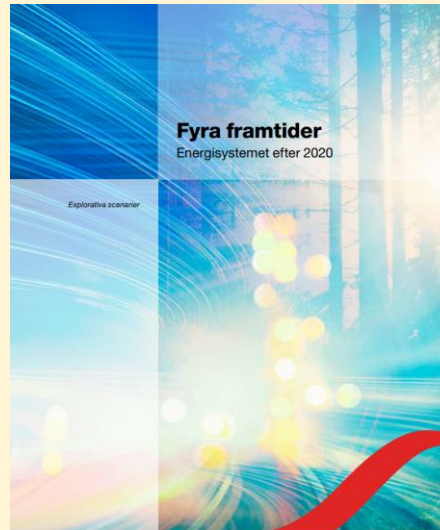

Trend analysis, Scenario analysis, Roadmaps

2019-2021. Aviation industry, authorities, ... Funding: Swedish Energy Agency

Examples of foresight projects

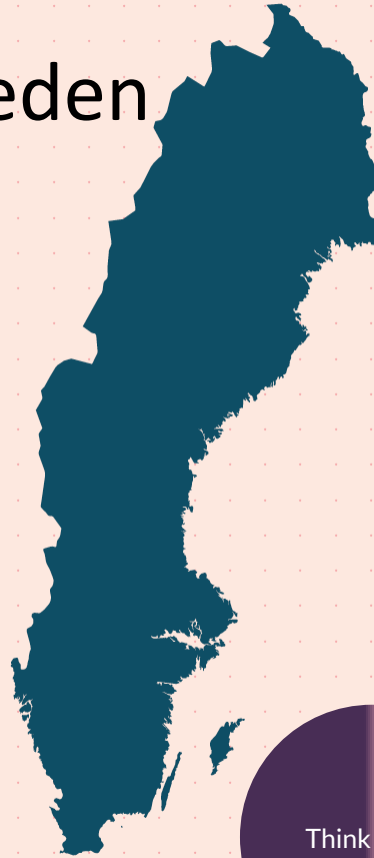

Four futures

Governance Innovation Sweden

We are going through societal changes where our current ways of governing are not enough. Governance Innovation Sweden aims to increase the ability of society to deal with complex challenges by exploring, showing, and accelerating implementation by new ways of steering and leading.

- **Anticipatory governance** - foresight (among other disciplines) organised as an institutional or cooperational capacity
- **Strategic foresight** – integration in policy and process
