

Corrigendum to “Viscosity of alumina doped soda lime silicate glasses – observation of anomaly in the linear increase as Al_2O_3 replaces SiO_2 ” [Journal of Non-Crystalline Solids Vol 573 (2021) start 121149]

Stefan Karlsson

Glass Unit, Department of Building and Real Estate, Division of Built Environment, RISE Research Institutes of Sweden, Växjö, Sweden

The authors regret publication of Fig. 1 in [1], that clearly do not show the rheometer setup, it should be replaced with the following Fig. 1.

The author would like to apologise for any inconvenience caused.
